CLOCK DRAWING TASK

Instruction

- **5. Unprompted drawing of a clock:** The subject is asked to draw a clock face on a blank sheet of paper, and to set the hands at “twenty-five minutes past ten”. (0-10)
- **6. Copy drawing of a clock:** The patient is asked to copy the presented clock. (0-10)

	Unprompted		Copy	
	Yes	No	Yes	No
The figure looks like a clock.				
The clock is not divided by lines or sectors.				
There is a symmetric disposition of numbers.				
Only 1 to 12 numbers are drawn.				
Hour numbers are correctly sequenced.				
Only two hands are drawn.				
Clock hands are represented as arrows.				
Hour hand is shorter than minute hand. Correct time.				
No words have been written.				
The number '25' has not been drawn.				

CLOCK DRAWING TASK CLARIFICATIONS

- The contour of the clock can be any shape that looks like a clock (e.g. square shape is allowed).
- The two hands must be represented as arrows.
- Not all numbers need to be present. The minimum numbers that must be present are the main ones (“3”, “6”, “9”, and “12”).
- Tick marks between numbers are not necessary but are accepted if placed at the correct locations. Using only tick marks to represent hours is not acceptable.

CLOCK DRAWING TASK CLARIFICATIONS

- Numbers must be inside the contour of the clock.
- Roman numbers are accepted.
- The short hand can be on '10' or between '10' and '11' but it cannot be on '11'.
- If the hands are not signaling the correct time (10:25) then the item 'The hour hand is shorter than the minute hand' will be penalized.
